

Arrddon (Kiryung Nam)*Media Artist / Creative Technologist / Learning Designer*Website arrddon.comEmail arrddon@gmail.comInstagram [@arrddon](https://www.instagram.com/arrddon)LinkedIn [Profile](#)**BIOGRAPHY**

Arrddon is an artist working between London and Seoul who designs participatory systems for collective imagination. Through installations, learning environments, workshops, and community-based projects, he creates situations where individual experiences become part of shared reflection, dialogue, and the imagining of possible futures. His practice combines interactive media, participation, and creative learning to explore how people construct meaning together.

He studied Arts Management at Korea National University of Arts and led the artist collective Rigidbody, developing collaborative projects and participatory workshops. He later taught as an Adjunct Professor, focusing on art and technology convergence and creative learning environments. He is currently pursuing an MA in Information Experience Design at the Royal College of Art in London and leads research at the Center for Creative Intelligence Design (CCID) in Seoul, exploring generative AI and interaction through system-based experimentation.
